Title

ELECTIONS

Description \(\)

You are the head of the election committee in your village. Each Political party is associated with a unique number and the votes are represented as an integer array A. where each element contains the party number voted for by the villagers. For a party to win, they must have a majority of votes. our task is to find and return an integer value denoting the winning party's number. Return -1 if there is no party with a majority.

Note: If only one vote is there he is the winner.

Input Format:

input1: An integer value representing the number the number of voters

input2: An integer array A representing the votes of the voters.

output Format:

Return an integer value denoting the winning party's number. Return -1 there is no party with a majority

Example 1:

Input:

112223

Output:

2

Explanation:

As 2 got the most number of votes i.e 3.

Example 2:

Input:

6

121122

Output:

-1
